

The NEW Comfortline Excel

UPGRADED ANTICORROSIVE TECHNOLOGY, ENHANCED DESIGN, 5 YEAR WARRANTY!

HIGH PERFORMING OVERHEAD ELECTRIC HEATING FOR HARD-TO-HEAT AREAS

The European-made Comfortline Excel is an upgraded model of the Comfortline Original series setting an even further refined standard for the quality and workmanship behind these high temperature overhead heating panels. This new series of panels for both indoor and outdoor applications reflects over two decades of manufacturing and design expertise and experience.

FEATURES & BENEFITS

- ✓ New 5 year warranty!
- ✓ Upgraded modern design with bevelled panel edges.
- ✓ **Higher resistance against corrosion:** The new model has two anticorrosive coatings that are applied to metal sheet parts made from AluZinc. Connecting material is also made from the same material and thus electrochemical reactions and the corrosion of parts is less likely to take place.
- ✓ **Simplified Installation:** The new model has been lengthened by 50 mm simplifying the connection to the supply conductors. This provides more space for the electrical terminations and makes the connection of the product to the supply conductors much easier. The terminals are also now accessible from two sides after removing the cover, allowing for greater ease of installation.
- ✓ **Extension of the non-heating part of the heating rod by 50mm:** Allows it to extend as far as the terminal compartment, thus eliminating the need to pass separate conductors from the heating elements into the space containing the terminals.

To order your Comfortline Excel panels please call us on

Excellence in Overhead Heating!

PRECISION COMFORT, LOW RUNNING COSTS AND EASY TO INSTALL!

The Comfortline Excel panels still have the same high level of heat emission as the Original series thanks to their unique “silicating” treatment on the heating surface which increases the actual surface area, ensuring the highest possible level of heat emission from the surface of each panel.

These panels are also packed with mineral wool insulation that reduces heat loss upwards making them extremely efficient to run. This high level of insulation also aids in eliminating vibrations.

The new model has two anticorrosive coatings that are applied to metal sheet parts made from AluZinc. Connecting pieces are also made from the same material and thus electrochemical reactions and the corrosion of parts is less like to occur.

Comfortline panels emit up to 10% more usable heat than similar panels on the market thanks to their unique surface treatment. The radiant surface is designed in sections of naturally anodised aluminium, set in a galvanised steel case for strength. The panels are powder-coated in off-white, giving them a sleek and attractive modern appeal. Other colours are available by special order.

PRECISION COMFORT AND ECONOMY: Comfortline panels are offered with one, two or three heating element panels. The higher output models with multiple elements can run independent of each other giving greater control over the radiant heat output.

IMPRESSIVE LOW RUNNING COSTS: A single high capacity Comfortline panel costs about 60c/hour[#] to run. A typical mushroom heater on bottled gas will cost five times that – up to \$3.00/hour[^].

INSTALLATION & MOUNTING: Installation is easy in new or existing buildings. You can mount the panel directly overhead (brackets supplied), suspend or recess them. Comfortline is perfect for overhead spaces as low as 2.4m, right up to 8m.

WARRANTY: 5 years

[#] Assumes Comfortline Excel 24 with electricity at 25c/kWhr

[^] Assumes \$25 refill for 9kg LPG bottle

Technical Data for Comfortline Excel Panels - Off-White						
Model	Number of Heating Panels	Total Output (W)	Voltage	Dimensions (mm)	Weight (kg)	IP Rating
C1E010	1	900	230/240V	1,550 x 150 x 60	8.1kg	44
C1E020	1	1,200	230/240V	1,550 x 150 x 60	8.1kg	44
C1E030	2	1,800	230/240V	1,550 x 250 x 60	12.9kg	44
C1E040	2	2,400	230/240V	1,550 x 250 x 60	12.9kg	44
C1E050	3	3,000	230/240V	1,550 x 350 x 60	17.7kg	44
C1E060	3	3,600	230/240V	1,550 x 350 x 60	17.7kg	44

5 year warranty
